

SECURITY SURVEILLANCE SYSTEM

QUESTIONS & RESPONSES

Q: Are you able to send me the RFQ project specs (or a link to the data) for the Security Surveillance System Project? I received the 15 page RFQ summary explaining the bid process, but not the project details.

A: The project specs are on page 6.

Q: Are you looking for cameras in parking lot to face building?

A: The bidder should propose the best solution based on their expertise.

Q: Is there access to wire cameras to the parking lot light poles?

A: We believe there is access; however, if it is determined that installation of cameras on light poles are adequate for the recommended solution, an electrician would need to be brought in to provide a quote. This will be a separate quote done by CAMW!
